

CLAIMS

1. A method comprising steps of:
2 receiving an incoming call from a first telephone number;
incrementing a variable indicating a number of calls received from said first
4 telephone number;
prompting a user to save said first telephone number when said variable is
6 equal to or greater than a threshold number;
storing said first telephone number in an address book.

2. The method of claim 1 wherein said prompting step comprises audibly
prompting said user.

3. The method of claim 1 wherein said prompting step comprises
presenting text on an LCD display.

4. The method of claim 1 wherein said threshold number is set by a
manufacturer.

5. The method of claim 1 wherein said threshold number is set by said
user.

6. The method of claim 1 further comprising a step of asking said user to
record a voice tag corresponding to said first telephone number.

7. The method of claim 6 wherein said asking step comprises audibly
asking said user.

8. The method of claim 6 wherein said asking step comprises presenting
text on an LCD display.

9. The method of claim 6 further comprising a step of saving said voice tag
corresponding to said first telephone number in a voice tag file.

10. The method of claim 6 further comprising a step of receiving said voice
tag corresponding to said first telephone number.

11. The method of claim 10 further comprising a step of comparing said
voice tag to a quality parameter.

12. The method of claim 11 further comprising a step of making a request to
said user to record said voice tag in a different location.

13. The method of claim 12 wherein said step of making said request
comprises making said request audibly.

14. The method of claim 12 wherein said making step comprises presenting
text on an LCD display.

15. The method of claim 10 further comprising a step of saving said voice
tag corresponding to said first telephone number in a voice tag file.

16. The method of claim 1 further comprising a step of receiving a voice tag
corresponding to said first telephone number.

17. The method of claim 16 further comprising a step of saving said voice
tag.

18. An apparatus comprising:
a receiver configured to receive an incoming call from a first telephone
number;
a CPU configured to increment a variable indicating a number of calls received
from said first telephone number;

6 a user interface adapter configured to prompt a user to save said first telephone
number when said variable is greater than a threshold number;

8 a memory module configured to store said first telephone number in an address
book.

19. The apparatus of claim 18 wherein said user interface adapter causes a
2 speaker to prompt said user to save said first telephone number.

20. The apparatus of claim 18 wherein said user interface adapter causes an
2 LCD display to prompt said user to save said first telephone number.

21. The apparatus of claim 18 wherein said threshold number is set by a
2 manufacturer.

22. The apparatus of claim 18 wherein said threshold number is set by said
2 user.

23. The apparatus of claim 18 wherein said memory module is further
2 configured to store a voice tag corresponding to said first telephone number.

24. The apparatus of claim 23 wherein said user interface adapter is further
2 configured to prompt said user to record said voice tag corresponding to said first
telephone number.

25. The apparatus of claim 23 further comprising a microphone configured
2 to receive said voice tag corresponding to said first telephone number.

26. The apparatus of claim 25 wherein said CPU is further configured to
2 save said voice tag corresponding to said first telephone number.

27. The apparatus of claim 26 wherein said CPU is further configured to
2 compare said voice tag to a quality parameter.

28. The apparatus of claim 27 wherein said user interface adapter is further
2 configured to prompt said user to record said voice tag in a new location.

29. A method comprising steps of:
2 receiving a voice tag corresponding to a first telephone number, said voice tag
having a recording quality;
4 comparing said recording quality to a quality parameter;
prompting a user to re-record said voice tag when said recording quality does
6 not satisfy said quality parameter;
saving said voice tag.

30. The method of claim 29 wherein said prompting step comprises
2 prompting said user audibly.

31. The method of claim 29 wherein said prompting step comprises
2 presenting text on said LCD display.

32. The method of claim 29 further comprising a step of saving said first
2 telephone number before said step of receiving.

33. The method of claim 29 further comprising a step of asking said user to
2 utilize a voice dialing feature.

34. The method of claim 33 wherein said asking step comprises audibly asking said
2 user.

35. The method of claim 33 wherein said asking step comprises presenting
2 text on an LCD display.
